Key Features

Upholstery fabric will be selected from approved contract quality fabric ranges, minimum Matindale test of 45,000 rubs and tested to Crib 5 or C&M. Fabric & Foam supplied complies with BS 7176: Fire test to non-domestic seating - Standard Brief

BS 7176 specifies requirements for the resistance to ignition of upholstered furniture used for seating when tested in accordance with BS 5852, BS EN 1021-1 or BS EN 1021-2, as appropriate. The levels of ignition resistance have been set after careful consideration of the fire risk of the particular end-use environment involved.

Furniture grade MFC or lacquered ply cladding panels are fixed to the external face of the main steel structure. Upholstered acoustic panels are clipped to the interior surface.

Low voltage LED lighting for consistent illumination is supplied on a PIR system with movement sensor. This ensures that when the unit is unoccupied the system will power down as an energy and cost saving measure and will activate when the pod is occupied.

Modular power sockets are fused and installed flush with the surface to comply with BS1363.

All UK and European socket types, data sockets and USB chargers are CE marked and certified by the manufacturers to comply with the relevant standards.

- Electromagnetic Compatibility Directive 2014/30/EU
- Low Voltage Equipment Directive 2014/35/EU
- RoHS2 Directive 2011/65/EU
