Product Details

DESIGNER

Spaceoasis internal design team in collaboration with Marks Barfield Architects.

DESCRIPTION

The Sage is one of Spaceoasis' most popular layouts. The "S" shape is highly space efficient creating two extremely private screened and symmetrical concave seating enclosures alongside each other. The opposing convex faces are used for informal touchdown. This layout enables private and group working to be conducted simultaneously.

FEATURES

- Multifunctional
- Modular construction
- Aesthetically pleasing
- Expandable
- Hardwearing
- Customisable
- Acoustic barrier

ACOUSTICS

Spaceoasis panels are constructed from unique pressed plywood frame with a paper honeycomb core, the faces of the panels as standard are finished in impact resistant high pressure laminate. When used in conjunction with the Spaceoasis fixed (or mobile) seating the interior of a pod has a very natural acoustic. The sound attenuation of a pod allows a conversation to take place in the middle of a busy office in a relative oasis from the ambient noise.

Product Details

The following warranty applies to all Spaceoasis products. Spaceoasis Ltd. warrants product sold to be free of defects in material and workmanship as follow:

- panels, steel assembly post and stop ends for the lifetime of the product
- seating & desktops for a period of 5 years unless if further limited by the fabric/material supplier warranty

WARRANTY

The Sage range is a scalable range of products that can be extended or reduced in size to suit individual needs. A wide range of additional furniture components can be added to the range to give the Sage products much more functionality.

EXPANDABILITY

SAG 001

W5070 X D2350 X H1480

SAG 002

W6325 X D3425 X H1480

SAG 003

W6470 X D3180 X H1480

STANDARD RANGE

additional information:

seat	450mm
seatback	1000mm
desktop	730mm
worktop	920mm
touchdown	1085mm

Technical Specification

PANEL HEIGHTS

All Sages are supplied at 1480mm as standard. This range can also be upgraded to 950mm, 1800mm or 2200mm.

DIAMETERS

All standard Sages are supplied at 2.5m internal diameter; this range of product can also be upgraded to 3m, 4m, 4.8m, 6m & 7.5m diameter.

SEAT TYPES

Spaceoasis have three types of seating for the Sage range each has its own benefit:

- mobile push up seats, the best value option for seating with the added benefit of being usable away from the pod should the need arise

- panel fixed seat back, the default option for all pods giving a mid cost option with a pleasing aesthetic

- integral seat back, single piece seating unit that allows the panel to remain unmarked in the installation process (surcharge applies)

Product Composition

06

PANEL

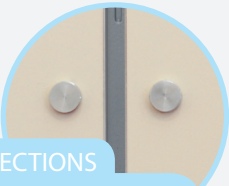

60mm thick, constructed from pre formed plywood frame with paper honeycomb core finished with 8mm thick fibre board skin and finishing layer .

LINKING POST

PVC coated mild steel section with predefined nut inserts.

CONNECTIONS

The panels are connected to the recessed linking post using security fixings, integral furniture connects through the feature relief joint

STOPEND

Stopends are constructed from pressed plywood, coated with clear lacquer.

SUPPORT BLADES

Desktop and seat support blades 25mm thickness, melamine on both faces with ABS edges, connected to linking post with cam locks .

SEATS

150mm thick, constructed from solid base with CMHR foam upholstered in a range of contract quality fabrics.

TOPS

Desktops, 30mm thick, melamine on both faces with ABS edges.

Please speak to our Technical Department to discuss options.

Finishes

PANELS

Finished in Abet colour laminate as standard, however panels can be specified with most post-formable materials. As an additional level of acoustic performance panels can be finished in fabric with an acoustic foam backing.

LINKING POSTS

All linking posts are finished in PVC, RAL 9006 grey as standard.

STOPENDS

Each Spaceoasis screen ends with a stopend that is constructed from radiused lacquered plywood or spray painted grey. Alternatively stopends can be spray painted to match or contrast with panels.

SUPPORT BLADES

All support blades finished in grey melamine with matching ABS edges as standard.

SEATS

All seating is finished in band 1 fabric as standard however all types are available in wide range of contract quality fabrics.

DESKS / WORKTOPS / TOUCHDOWNS

Horizontal surfaces as standard are finished in White MFC with matching or contrasting ABS edges. Alternatively surfaces can be laminated in any suitable laminate and matching or contrasting ABS edge.
