### Multi-Purpose Seating

The elegantly fine solid wire chrome sled frame takes up little space, allowing light to travel freely, whilst being extremely strong and durable. The comfortably moulded plastic seat and back are available in three colours - black, white and blue while optional upholstered seats and backs provide even greater comfort when required. The chairs stack together very closely, allowing large numbers to be stacked onto the special trolley and relocated or stored until your area becomes the next hive of activity.

STG 1\_ Medium back, sled base, volume stacking plastic chair.
